

Widget:Google Form

Tento widget nebude zobrazovat novější google formuláře, protože parametr "key" už zřejmě neexistuje. Místo toho lze použít `Widget:Iframe` !!!

- This widget allows you to add **Google Spreadsheet Forms** (<https://documents.google.com/support/spreadsheets/bin/answer.py?hl=en&answer=87809>) to your wiki page.
- It was originally created by Sergey Chernyshev for Semantic Communities LLC. (<http://www.semanticcommunities.com/>)
- To insert this widget, use the following code:

```
{{#widget:Google Form
|key=po-s58YMwf85Q3UxRzdG0Bw
|width=600
|height=750
}}
```

Parameters

- **key** - key parameter in emailing/embedding URL
- **width** and **height** define form dimensions, 300x400 is default, but you might want to copy it from embed code since size depends on fields you have

Related widgets

- Google Document - for embedding documents
- Google Spreadsheet - for embedding spreadsheets
- Google Presentation - for embedding presentations
